

The powerful and affordable PC for general business needs

IBM PC 300GL with Pentium® II processor

Highlights

Superb performance and value

The IBM PC 300GL exploits the power of an Intel® Pentium II processor, AGP graphics and 100MHz SDRAM to deliver superior performance at surprisingly affordable prices.

Industry-leading manageability

The IBM PC 300GL supports IBM's unique package of client management tools, like Wake on LAN technology¹ and LANClient Control Manager software,² that can significantly reduce the costs of deploying and maintaining networked IBM PCs by eliminating many routine visits to each machine. In addition, IBM's new Universal Management Agent software ensures seamless upward integration with your existing management environments.

Optimum flexibility and expandability

The IBM PC 300GL can fulfill your needs with either a desktop or minitower configuration and your choice of network interface and audio adapter, available from Options by IBM. An award-winning NLX motherboard and advanced chassis design make this PC a breeze to upgrade and maintain.

Critical data protection

IBM PCs help protect your data with SMART Reaction™ software,³ which can automatically back up data in the event of a hard disk failure.

Enhanced reliability with Windows NT

The combination of IBM's state-of-the-art asset protection software and Windows NT 4.0 Workstation's file system security (NTFS) with crash protection safeguards your data and your corporate computing.

Total system solutions

IBM SystemXtra⁴ can provide you with hardware, software, services and financing in a total, customized package with a single monthly payment.

An IBM PC 300GL with a Pentium II processor offers the raw power your newest business applications need while maintaining exceptional value and affordability. It is designed to help you manage your business, and your budget.

*These IBM PC 300GL models are in addition to the IBM PC 300GL models that feature a Pentium processor with MMX technology or a Celeron processor.

Note: Configurations of hardware and software can be customized to your needs through IBM's Authorized Assembler Program (AAP).

1 Requires Wake on LAN-enabled Ethernet or Token-Ring adapter, sold separately.

2 LANClient Control Manager is graphical, server-based software available for downloading at no additional charge (Internet access fees excepted) at www.ibm.com/pc/desktop/lccm3 IBM SMART Reaction software is available via Internet download to IBM PC 300GL customers at no additional charge (Internet access fees excepted) at www.ibm.com/pc/us/desktop/sr

4 Available in selected countries.

5 MHz only measures microprocessor internal clock speed, not application performance. Many factors affect application performance.

6 GB equals one billion bytes when referring to hard drive capacity; accessible capacity may be less depending on operating environments.

7 Variable read rate. Actual playback speed will vary and is often less than the maximum possible.

8 Some software may differ from its retail version (if available), and may not include user manuals or all program functionality.

9 CD ROM and hard copy documentation available at additional charge.
