Digital Vision, Inc. 14 Oak Street - Suite 2 Needham, MA 02192 (617) 444-9040

Dear Customer:

Thank you for selecting the COMPUTEREYES Video Acquisition System - we're sure you'll be satisfied with your choice. COMPUTEREYES has finally made economical image digitizing available to Atari owners.

We are taking this opportunity to announce a new product enhancement to the COMPUTEREYES system - the Graphics 9 Mode Compatibility package. Atari computers are well known for their numerous graphics modes, each with its own special capabilities. In the Atari Graphics 9 Mode, resolution is sacrificed for the

ability to display images containing 16 levels of grey. These images are superb! The image at left is a screen photo of a COMPUTEREYES acquired Graphics 9 Mode image. The Graphics 9 Mode Compatibility Software contains all the features and capture modes of the standard system software in addition to the Graphics 9 capture routine. Operation is identical except when acquiring Graphics 9 images where the scanning time is increased to approximately 90 seconds to allow 16 scans.

The Graphics 9 Mode Compatibility package includes disk and manual and is available for \$15.00 from your dealer or direct from Digital Vision (include \$1.00 shipping and handling).
