

March 21, 1990

This pamphlet contains procedures for isolating problems to a FRU, a Symptom-To-FRU Index, and a parts listing for the IBM* Personal System/2* Model 25 and Model 30.

This pamphlet is intended to be used with the IBM Personal System/2 Hardware Maintenance Reference manual (part number 15F2190) and the IBM Personal System/2 Hardware Maintenance Service manual (part number 15F2200).

Part Number 15F2191

Form Number S15F-2191-00

Safety Information

Refer to the *Hardware Maintenance Service General Information* pamphlet for the following information:

- General Safety
- Electrical Safety
- Safety Inspection Guide.

First Edition (March 1990)

The following paragraph does not apply to the United Kingdom or any country where such provisions are inconsistent with local law: INTERNATIONAL BUSINESS MACHINES CORPORATION PROVIDES THIS PUBLICATION "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Some states do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement may not apply to you.

This publication could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. IBM may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time.

It is possible that this publication may contain reference to, or information about, IBM products (machines and programs), programming, or services that are not announced in your country. Such references or information must not be construed to mean that IBM intends to announce such IBM products, programming, or services in your country.

Requests for technical information about IBM products should be made to your IBM Authorized Dealer or your IBM Marketing Representative.

IBM may have patents or pending patent applications covering subject matter in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to the IBM Director of Commercial Relations, IBM Corporation, Armonk NY 10504.

General Checkout

The advanced diagnostic tests are intended to test only IBM products. Non-IBM products, prototype cards, or modified options can give false errors and invalid system responses.

IMPORTANT:

- If more than one error code is displayed, diagnose the first error code first. The cause of the first error code can cause false error codes to be displayed.
- If an adapter or device consists of more than one FRU, an error code may be caused by any of the FRUs. Before replacing the adapter or device, remove the FRUs, one by one, to see if the symptoms change.

"8525" or "8530" following a part number or Note: instruction applies only to that system. If a system type is not specified, the part number or instruction applies to both systems.

001

- Check all cables and power cords.
- If you cannot load a diagnostic diskette, go to "Symptom-to-FRU Index."
- Load the Advanced Diagnostics diskette and check for the following responses:
 - 1. Memory test
 - 2. One or two short beeps
 - 3. First diagnostic menu.

ARE ALL THREE RESPONSES CORRECT?

(Step 005 continues)

005 (continued)

- Run the Advanced Diagnostic tests.

ARE THE TESTS SUCCESSFUL?

You may have an intermittent problem.

- Check for damaged cables and connectors.
- 2. Reseat all adapters, drives, and modules.
- Start an error log and run the tests multiple times.

Memory

PARITY CHECK 1 indicates that memory on the system board has failed. If the system has a total of 512KB memory installed (8525), replace the memory-module packages. If the system has a total of 640KB memory installed and the address (number displayed below PARITY CHECK 1) is less than 20000, replace the optional memory modules (8525), or the system board (8530). Otherwise, replace the memory module (8525) or \$1 and \$2 (8530).

PARITY CHECK 2 indicates that an adapter memory module has failed. See "Undetermined Problem" to identify the failing adapter.

001

Memory errors are displayed as:

AAAAAA BB CCCC 20X

To isolate a memory failure, answer the following questions.

DID YOU RECEIVE A "205 MEMORY ERROR"
MESSAGE DURING POST OR WHEN RUNNING THE
MEMORY TESTS?

(Step 003 continues)

Replace Memory-Module Package 2 (8525) or S1 (8530).

019

Failing adapter memory, see "Undetermined Problem."

Printer

- Make sure the printer is properly connected and powered-on.
- 2. Run the printer self-test.

If the printer self-test does not run correctly, the problem is in the printer. Refer to the printer service manual.

If the printer self-test runs correctly, install a wrap plug on the parallel port and run the advanced diagnostic tests to determine which of the following FRUs is failing:

- System board
- Parallel adapter
- Printer cable.

Display Self-Test

- 1. Power-off the system.
- 2. Power-off the display (8530).
- Unplug the display signal cable from the system.
- 4. Power-on the display (8530).
- 5. Power-on the system (8525).
- Turn the Brightness and Contrast controls to their maximum setting.
- The display should have a white or light gray screen with a black margin on both sides. If not, replace the display assembly (8525) or display (8530).

Installed Devices

If an adapter or device is missing from the Installed Devices list, replace that adapter or device.

If an adapter is shown in the Installed Devices list and is not present in the system, remove the bus adapter. If the error remains, replace the system board.

Undetermined Problem

- 1. Power-off the system.
- Remove or disconnect the following adapters and devices, one at a time:
 - a. Non-IBM devices
 - Any external devices (modem, printer, or mouse)
 - c. Math coprocessor
 - d. Any adapter
 - e. Bus adapter (ignore the 161 error)
 - f. Diskette drive cable
 - g. Fixed disk drive cable.
- 3. Power-on the system.
- Repeat the previous steps until you find the failing adapter or device.

Power Supply / Fan

If the power-on indicator (8525) is not glowing, or if the power-supply fan is not running, check the voltage selector switch setting (8525), if correct, replace the display assembly (8525), or power supply (8530).

If all adapters and devices have been removed and the problem remains, check the power-supply output voltages. If the output voltages are good, replace the system board.

Vdc Minimum	Vdc Maximum	-Lead Pin	+ Lead Pin
+4.8	+5.2	P7-5	P7-10
+4.5	+5.4	P7-9	P7-5
+11.5	+12.6	P7-5	P7-3
+10.8	+12.9	P7-4	P7-8

Vdc Minimum	Vdc Maximum	-Lead Pin	+ Lead Pin
+4.8	+5.2	P3-5	P4-4
+4.6	+5.5	P4-3	P3-6
+11.5	+12.6	P4-1	P3-3
+10.8	+13.2	P3-4	P4-2

Symptom-to-FRU Index

The Symptom-to-FRU Index lists error symptoms and the causes that could be responsible. The most likely cause is listed first.

Important: To determine what is actually failing, always begin with "General Checkout" if you are using the Advanced Diagnostics diskette.

If the system displays an error message and gives an incorrect audio response, the FRUs that have most-likely failed are those listed for the error message. An X in an error message can be any number.

Symptom/Error	FRU/Action

How To Use This Parts Catalog

SIMILAR ASSEMBLIES: If two assemblies contain a majority of identical parts, they are broken down on the same list. Parts peculiar to one or the other of the assemblies are listed separately and identified by description.

AR: (As Required) indicates that the quantity is not the same for all machines.

R: (Restricted) indicates that the part has a restricted availability.

INDENTURE the indenture is marked by a series of dots located before the parts description. The indenture indicates the relationship of a part to the next higher assembly. For example:

Indenture	Relationship of Parts
(No dot)	Main Assembly

(One dot)

· Detail parts of a main assembly

(One dot) (Two dot) Subassembly of the main assemblyDetail part of a one-dot subas-

sembly
