

# NETBUILDER II® DPE SOFTWARE VERSION 9.3.1 RELEASE NOTES

The NETBuilder II DPE *plus* module requires software version 9.3.1 or later. Version 9.3.1 is the latest software for all DPE modules, including DPE 40 and DPE 80.

If you are using a DPE 40 or DPE 80 that is running software version 9.3, you do **not** have to upgrade to version 9.3.1.

If you are upgrading to a DPE *plus*, you will need to upgrade from 9.3 to 9.3.1. Refer to "Upgrade Procedure with Automatic Recovery and a Hardware Upgrade" on page 4-7 of *Upgrading NETBuilder Family Software*.

If you are loading software to a SuperStack™ II NETBuilder® or OfficeConnect™ NETBuilder boundary router from the 9.3.1 CD-ROM or flash memory card, you must use the following option with the `bcmsysupgrade` command:

```
-V:<version upgrading to>
```

For SuperStack II NETBuilder boundary routers, use:

```
bcmsysupgrade -V:93 [options] <stage> <device>
```

For OfficeConnect NETBuilder boundary routers, use:

```
bcmsysupgrade -V:93003 [options] <stage> <device>
```

Refer to *Upgrading NETBuilder Family Software* for more information.
