

Instructions on Uninstallation of HASP runtime drivers

- 1) Download the Latest HASP runtime installer (command line version) from www.safenet-inc.com on your local machine then you have to extract the "haspdinst.exe" file from the downloaded .zip file. After that you need to open up a command prompt window by clicking on the start button on your desktop and then typing in "CMD" in the search box.
- 2) Please provide the path of the hasp installer in the command prompt or you can drag and drop the haspdinst.exe setup file into command prompt

```
C:\WINDOWS\system32\cmd.exe
Microsoft Windows XP [Version 5.1.2600]
(C) Copyright 1985-2001 Microsoft Corp.
C:\Documents and Settings\akagrawal>C:\Sentinel_LDK_Run-time_cmd_line\haspdinst.exe_
```

- 3) Now use following commands **haspdinst.exe -kp -r -fr -purge** and hit the enter key for Un-installation. It will remove the installed HASP drivers.

```
C:\WINDOWS\system32\cmd.exe
Microsoft Windows XP [Version 5.1.2600]
(C) Copyright 1985-2001 Microsoft Corp.
C:\Documents and Settings\akagrawal>C:\Sentinel_LDK_Run-time_cmd_line\haspdinst.exe -kp -fr -r -purge_
```

- 4) Once the Un-installation is completed you will get the message "Operation completed successfully"; you can click on OK.

- 5) Once you are through with that, Re-start the machine.
